MANOJKUMAR

WITH YOUR MOM AT VEGITABLES & FRUITS MARKET

Hey John, you have visited the vegetable & fruit market with your mom to help her buy some fruits and vegetables of your choice and found that there are many types.

Your observation

You have seen tray filled with lot of Mangoes, Tomatoes, Carrots, Bananas, Potatoes, Onions, Apples, Grapes, Pomegranates etc. with a price tag.

What are you going to buy?

Your list of choices is the priority of your mom because she wants to make you happy and healthy.

She decided to buy of your choice, and you set your choices for the following...

- 1kg Apple
- 1kg Tomato
- 1kg Carrot
- 1kg Banana

Your mom decided that you observe and buy the fruits and vegetables and count the prices to strengthen your math.

Calculation

You see the following rates are mentioned in the display for each product you are going to buy as follows...

- 1kg Apple = 2 Dollar
- 1kg Tomato = 5 Dollar
- 1kg Carrot = 5 Dollar
- 1kg Banana = 4 Dollar

Note: Symbol '=' means 'equals to' in math means the value of product for 1kg.

Addition

Your mom asked you to calculate it and inform you how much she must pay for the total number of products bought.

You are aware that how to calculate all because you have done your homework for addition and want to help your mom to inform her of the total cost of buying products.

You calculated it by adding the price of each product as follows...

2+5+5+4 = 16 Dollar

Hey, you proved to your mom that you can also calculate doing simple math of addition you did it at your school & home.

Conclusion: You learn the symbol of addition and equals to at school and home and simply applied it, this is math magic.
